**Applications**

The valve is available with manual, hydraulic remote, pneumatic and electrohydraulic controls.

Working sections have auxiliary valves and a broad range of interchangeable spools.

Special versions for LS variable pumps can be realised on request.

Suitable for applications including Wheel loaders, Truck cranes, Drilling machines, Sea platform cranes, Presses, Compactor, Hook and Skip loaders.

SECTIONAL VALVE | D20

## GENERAL SPECIFICATIONS

## Standard working conditions

Description	Value
Ambient operating temperature range	-40°C / +60°C
Kinematic viscosity range	10 ÷ 300 cSt
Max contamination level	9 (NAS 1638) - 20/18/15 (ISO 4406:1999)
Recommended filtration level	b10 > 75 (ISO 16889:2008)
Internal filter (on electroproportional valves pilot line)	30 µm

All information and diagrams in this catalogue refer to a mineral base oil VG46 at 50°C temperature  
(32 cSt kinematic viscosity)

## Fluid options

Types of fluid (according to ISO 6743/4) Oil and Solutions	Temperature (°C)		Compatible gasket
	min	max	
Mineral Oil HL, HM (or HLP acc. to DIN 51524)	-25	+80	NBR
Oil in water emulsions HFA	+5	+55	NBR
Water in oil emulsions HFB	+5	+55	NBR
Polyglycol-based aqueous solution HFC	-10	+60	NBR

For special applications and different fluids, please call our Technical Department.

## SECTIONAL VALVE | D20

## Tie-rod kit classification (appendix "A")

Tie rod kit allows the correct assembly of sectional valves. Tie rod's length depends on the number of sections; each valve is assembled with tie rod kits including a tie rod, two nuts and two washers. D20 requires 4 tie-rod kits.

Tie rod kit	Order Code	Lenght (mm)	Clamping Torque (Nm)	Quantity
D20/1	300108001	248		
D20/2	300108002	312		
D20/3	300108003	376		
D20/4	300108004	440		
D20/5	300108005	504		
D20/6	300108006	568		
D20/7	300108007	632	110	4
D20/8	300108008	696		
D20/9	300108009	760		
D20/10	300108010	824		
D20/11	300108011	888		
D20/12	300108012	952		

## Painting

On request, all Hydrocontrol valves can be delivered painted (RAL 9005 black primer).

Pneumatic control classification

code	description	schema	dimensions	configuration
<b>F020A</b>	Pneumatic control ON - OFF	-	-	-
<b>F021A</b>	Pneumatic control ON - OFF rotated 180°	-		Proportional control with port BSP: G 1/4
<b>F022A</b>	Proportional Pneumatic control	-	-	-
<b>F023A</b>	Proportional Pneumatic control rotated 180°	-	-	
<b>F135A</b>	Pneumatic control ON - OFF	-	-	
<b>F136A</b>	Pneumatic control ON - OFF rotated 180°	-		Proportional control with port NPTF: 1/8-27
<b>F126A</b>	Proportional Pneumatic control	-	-	-
<b>F127A</b>	Proportional Pneumatic control rotated 180°	-	-	-

Proportional pneumatic control curve

The diagram shows the spool stroke as a function of the pneumatic pressure operating.

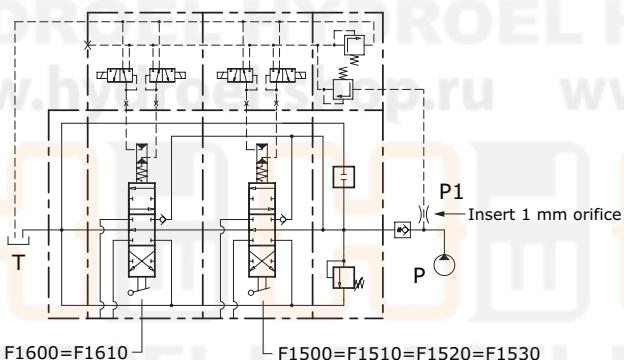

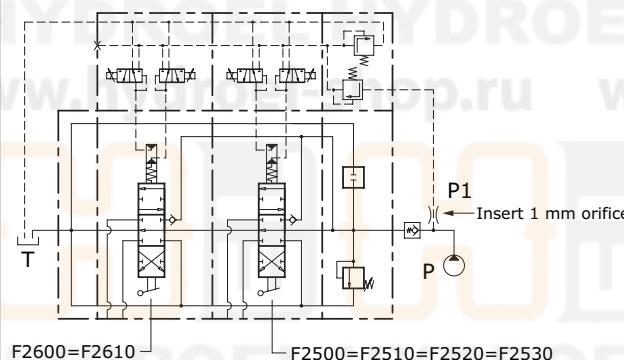

## Electrohydraulic control specifications

Operating temperature range  
Max inlet pressure  
Reduced pressure  
Back pressure on (T)  
Filtering degree  
Recommended pilot pipe size

-20°C / +80°C  
350 bar  
16 bar  
3 bar  
25 µ assoluti  
Ø 6 mm - G 1/4

Electrohydraulic ON-OFF control  
with fixed pressure reducing valveElectrohydraulic PROPORTIONAL control  
with fixed pressure reducing valve

Proportional control kit, mechanically retrooperated, allows the maximum precision of positioning, limiting the hysteresis. The control is operated with PWM control of the current. PWM frequency suggest: 60-80 Hz

## regulation currents

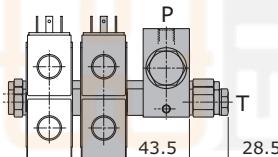

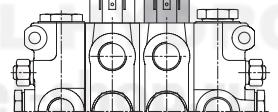

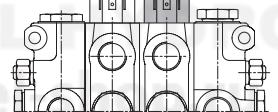

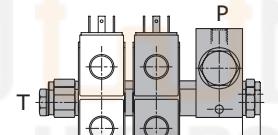

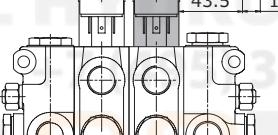

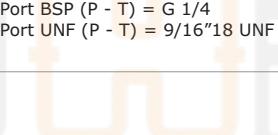

Nominal voltage (V)	Resistance R <sub>20</sub> (Ohm)	Current min (A)	Current max (A)
12 vdc	3,7	0,9	1,7
24 vdc	15,5	0,45	0,85

## Electrohydraulic control classification

code	description	dimensions	configuration
<b>F1600</b>	3 positions electrohydraulic control ON - OFF 12 Vdc		
<b>F1610</b>	3 positions electrohydraulic control ON - OFF 24 Vdc		
<b>F2600</b>	3 positions electrohydraulic control PROPORTIONAL 12 Vdc		
<b>F2610</b>	3 positions electrohydraulic control PROPORTIONAL 24 Vdc		

Electrohydraulic ON-OFF control is stackable with electrohydraulic PROPORTIONAL control (F2600 = F2610). Control kit already includes orifice to make spool displacement more gradual.

**Electrohydraulic control with fixed pressure reducing valve classification**

code	description	configuration
<b>F1500</b>	Electrohydraulic control ON - OFF (fixed pressure reducing valve) P - T inlet side (12 vdc)	
<b>F1510</b>	Electrohydraulic control ON - OFF (fixed pressure reducing valve) P - T inlet side (24 vdc)	
<b>F2500</b>	Electrohydraulic control PROPORTIONAL (fixed pressure reducing valve) P - T inlet side (12 vdc)	
<b>F2510</b>	Electrohydraulic control PROPORTIONAL (fixed pressure reducing valve) P - T inlet side (24 vdc)	Port BSP (P - T) = G 1/4 Port UNF (P - T) = 9/16"18 UNF
<b>F1520</b>	Electrohydraulic control ON - OFF (fixed pressure reducing valve) P inlet - T outlet (12 vdc)	
<b>F1530</b>	Electrohydraulic control ON - OFF (fixed pressure reducing valve) P inlet - T outlet (24 vdc)	
<b>F2520</b>	Electrohydraulic control PROPORTIONAL (fixed pressure reducing valve) P inlet - T outlet (12 vdc)	
<b>F2530</b>	Electrohydraulic control PROPORTIONAL (fixed pressure reducing valve) P inlet - T outlet (24 vdc)	Port BSP (P - T) = G 1/4 Port UNF (P - T) = 9/16"18 UNF

**Control tie rod assembly**

The length of the control tie rod, will change depending on the section numbers; in this way it will be easy to install in the right way the sections and avoid any misassembly. Each kit is composed by 2 tie rods, 2 plugs, 2 connection ports and spacers according to the section number.

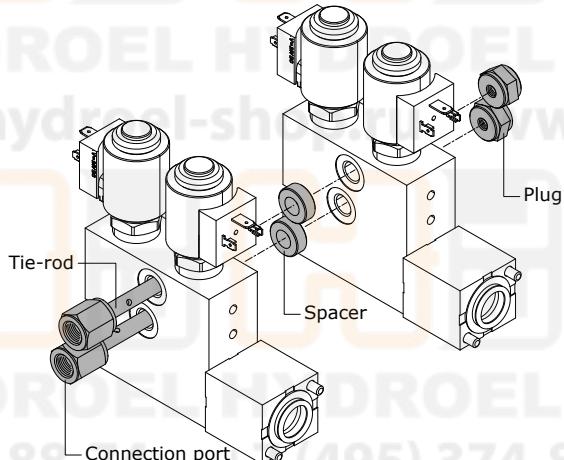

**NOTE:** the control tie rod kit has always to be ordered separately.

Reducing valve, combined with electrohydraulic control kit has to be calculated as a normal working section.

**ORDER EXAMPLE:**

Complete valves with 3 sections F1600 requires a complete tie-rod kit /3.

Complete valves with 2 sections F1600 and 1 section with F1500 (reducing valve) requires a complete tie-rod kit /4.

**Order code fixed pressure reducing valve:**

**915000303** = reducing valve for BSP ports

**915000312** = reducing valve for UNF ports

**Order code for control tie rod (BSP):**

**320103001** = control tie rod /1

**320108001** = control tie rod /2

**320108002** = control tie rod /3

**320108003** = control tie rod /4

**320108004** = control tie rod /5

**320108005** = control tie rod /6

**320108006** = control tie rod /7

**320108007** = control tie rod /8

**320108008** = control tie rod /9

**Order code for control tie rod (UNF):**

**320103026** = control tie rod /1

**320108012** = control tie rod /2

**320108013** = control tie rod /3

**320108014** = control tie rod /4

**320108015** = control tie rod /5

**320108016** = control tie rod /6

**320108017** = control tie rod /7

**320108018** = control tie rod /8

**320108019** = control tie rod /9

### Work section identification

+7 (495) 374-88-74 +7 (495) 374-88-74 +7 (495) 374-88-74

#### working section type

**RP G06**

Parallel  
circuit  
section

**RP G07**

**RP U06**

**RP S05**

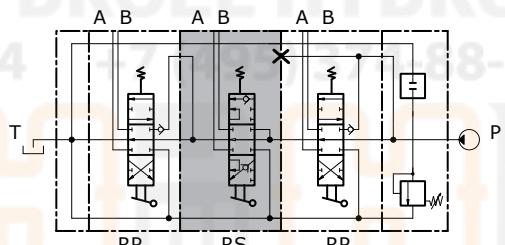

**RP S06**

**RP S33**

**RP S34**

When the spool is operated it intercepts the by-pass gallery by diverting the flow of oil to service port A or B. If two or more spools are actuated at the same time, the oil will power the service port that has the lower load; by throttling the spools, the flow of oil can be divided between two or more service ports.

**RS G06**

Series  
circuit  
section

**RS G07**

**RS U06**

**RS S05**

**RS S06**

**RS S33**

**RS S34**

When the spool is operated it intercepts the switch gallery by diverting the flow of oil to service port A or B. The oil that flows back from the actuator is carried to the switch gallery thus making it available to the service ports downstream from the series section. The pressure drop downstream is added to the pressure drop of the section itself.

## Auxiliary valve identification

code	description	schema	configuration	setting range (bar)			
				type	at full flow	type	at min. flow
01 PA	Antishock valve (port A)			A	0 / 70	A	0-A / 50-A
				B	71 / 120	B	51-A / 70-A
				C	121 / 150	C	71-A / 110-A
				D	151 / 300	D	111-A / 240-A
				E	301 / 350	E	241-A / 350-A
02 PA	Anticavitation valve (port A)						
04 PA	Pilot combined valve (port A)			A	30 / 110		
05 PA	Prearrangement for auxiliary valve (port A)			B	111 / 350		

code	description	schema	configuration	setting range (bar)			
				type	at full flow	type	at min. flow
01 PB	Antishock valve (port B)			A	0 / 70	A	0-A / 50-A
				B	71 / 120	B	51-A / 70-A
				C	121 / 150	C	71-A / 110-A
				D	151 / 300	D	111-A / 240-A
				E	301 / 350	E	241-A / 350-A
02 PB	Anticavitation valve (port B)						
04 PB	Pilot combined valve (port B)			A	30 / 110		
05 PB	Prearrangement for auxiliary valve (port B)			B	111 / 350		

## Auxiliary valve - Setting range

Sections designed to house auxiliary valve option require double choice on work ports A and B.

Always indicate setting value when using antishock valve and pilot combined valve:

**01 PA (120) = setting at full flow**

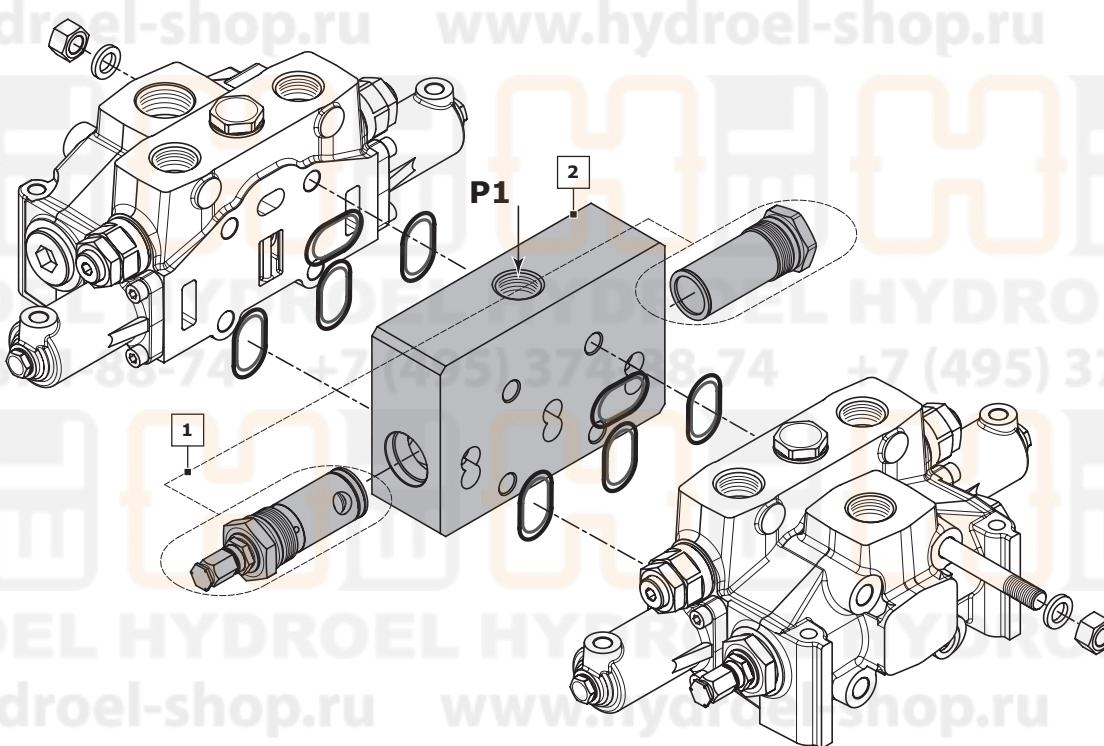

**01 PA (120-A) = setting at min. flow**

**04 PA (120) = setting at min. flow**

## INTERMEDIATE INLET SECTION

Order example

	BE	009	150	A G06
1.	BE	inlet side _____		
1.	009	valve arrangement _____		
1.	150	setting (bar); when ordering a main relief valve it is necessary to specify setting _____		
2.	A G06	inlet position and available thread type _____		

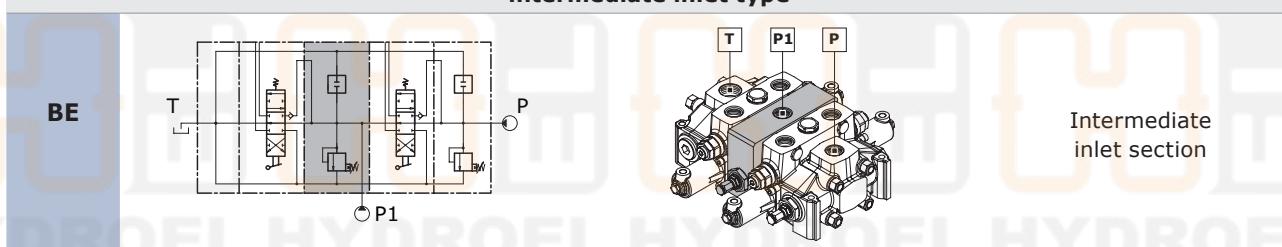

Rif.	Code	Description	Page
-	<b>BE</b>	Intermediate inlet section	
-	<b>BV*</b>	Intermediate inlet section with pressure relief valve	26
1	<b>009</b>	Pilot operated pressure relief valve	
1	<b>010</b>	Pilot operated pressure relief valve and Main anticavitation check valve	
1	<b>019</b>	Without valves	
1	<b>020</b>	Main anticavitation check valve	27
2	<b>A G06</b>	Upper inlet (thread G 1)	
2	<b>A U06</b>	Upper inlet (thread 1"5/16-12 UNF)	

NOTE: when ordering a relief valve it is necessary to specify factory setting (example 150).

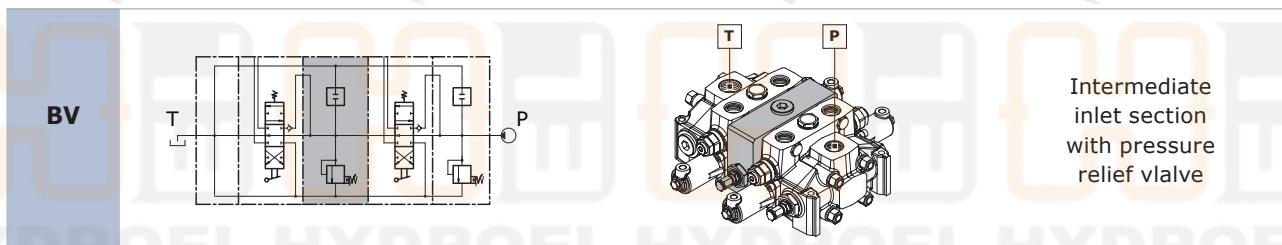

\* = omit the code for inlet positioning and thread

## Intermediate inlet section classifications

The intermediate inlet section is driven by two pumps (P + P1). The downstream elements can be set to a lower pressure than the upstream ones by adjusting the pressure relief valve of the intermediate section in question.

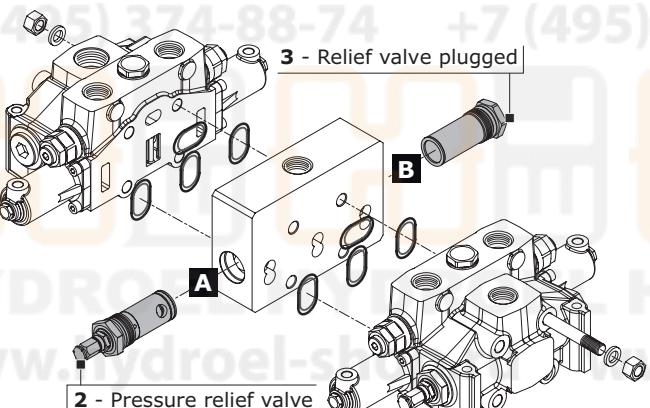

The intermediate inlet section and the elements are driven by a single pump (P). The downstream elements can be set to a lower pressure than the upstream ones by adjusting the pressure relief valve of the intermediate section in question.

## Valve identification on intermediate inlet section

type	schema	layout	description	type	schema	configurazione	descrizione
2			Pilot operated pressure relief valve	4			Externally piloted valve
3			Relief valve plugged	11			Plug with pressure-gauge connection

## Valve arrangement on intermediate inlet section

## Combination valve example: 009 = 2A - 3B

- 009 Combination valve
- 2A Pressure relief valve in port A
- 3B Relief valve plugged in port B

## The code identifies:

with a number, the type of valve; with a letter its position on the inlet section.

(A) = spool action side

(B) = spool return action side

**NOTE:** when ordering a main relief valve it is necessary to specify setting

## Intermediate outlet section classifications

The above outlet section allows the flow of oil of the two pumps and the tank ports to be piped to a single outlet T.

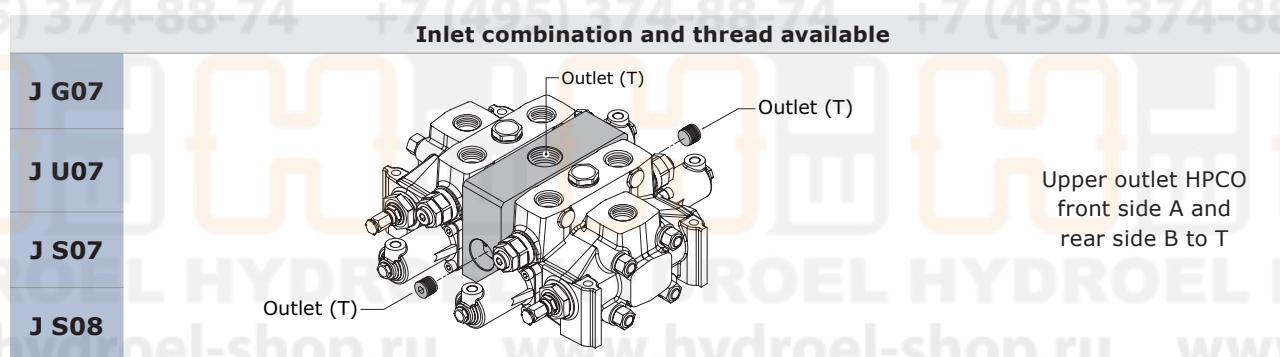

The section in question allows the flow of oil of the two pumps to be piped in two outlets: HPCO for powering another directional control valve, T for discharge of the work ports. In order to obtain this, the two T need to be linked.

**CARRY-OVER CONNECTION (HPCO)**

This option, available on all D20, allows the sectional valve to feed a second valve, by extending the free flow channel. In this configuration, the valve need a separated port for connection to tank.

It is possible to transform sectional valve from standard to HPCO version just by ordering the appropriate conic plug:

**code (HPCO Plug identification)**

## INSTALLATION AND MAINTENANCE

### Guidelines

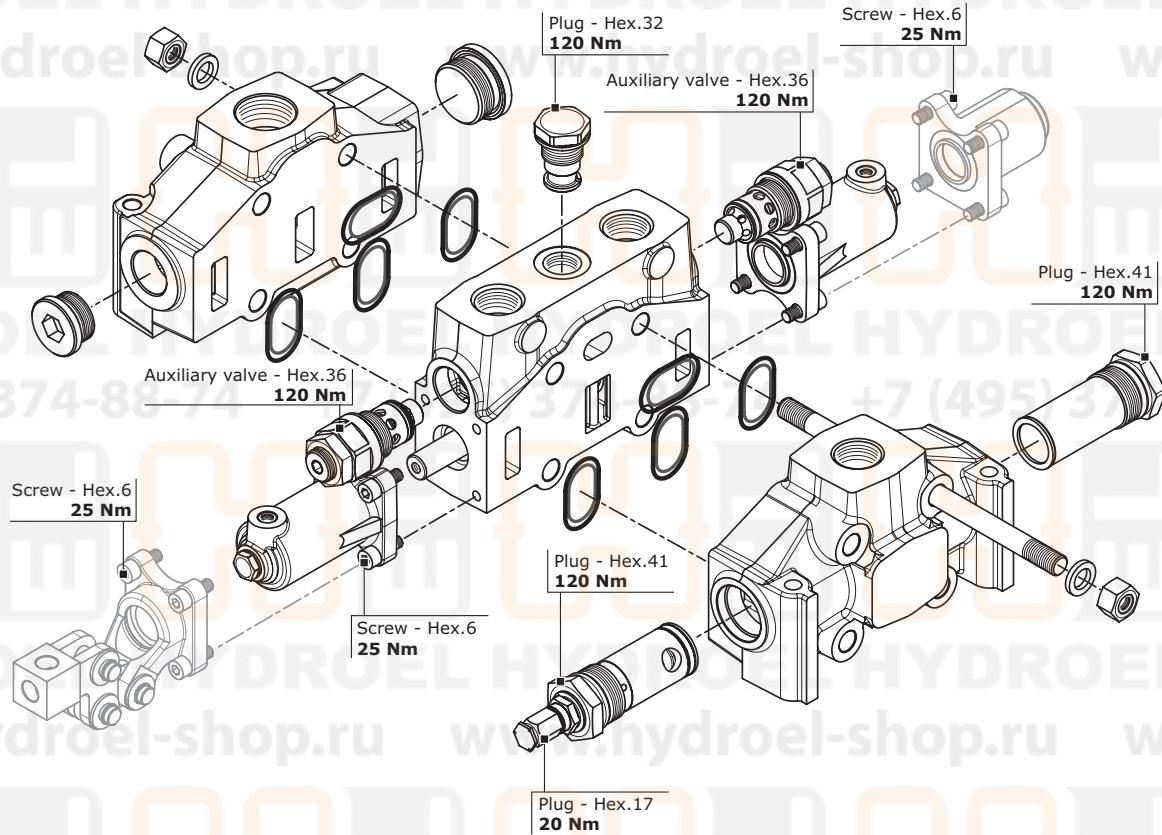

- Mount the control valve securely to a flat surface (recommended 3 point fixing); at the time do not use a hammer to positioning by hitting.
- When handling the control valve, be careful not hold the pilot cover or return spring cap of the spool or accessory valves such as main relief valves and anti-shock relief valves.
- Clean piping materials sufficiently before use.
- Make sure to prevent the port openings from being entered with dust or foreign matters.
- Tighten the port connectors surely with the recommended fastening torques.
- Do not direct the jet of a pressure washing unit directly to the valve.

### Fittings tightening torque (Nm)

## GENERAL CONDITIONS AND PATENTS

### Product identification

All Hydrocontrol products have an identifying plate placed in specific position.

Serial number

**000807500**

Product code

**44612**

#### Serial number:

It univocally identifies the physical valve: this provides an easy way to find all sales and production details.

#### Product code:

It is a number univocally identifying the configuration and pressure settings of a valve.

### Introduction

These general conditions apply to all general supplies from Hydrocontrol s.p.a., after receiving orders from the Customer. Should commercial terms such as EXW, DDP, etc be mentioned, of course the Incoterms of the International Chamber of Commerce must be referred to, according to the test existing when the general supply conditions are agreed on.

### Management of orders

No Customer's order is binding to Hydrocontrol s.p.a. if Hydrocontrol s.p.a. has not confirmed the order in writing. Hydrocontrol s.p.a. commits to supplying the orders in compliance with the order confirmation that has been issued. Any disagreement with the content of the order confirmation must be communicated in writing to Hydrocontrol s.p.a. within and no later than 5 days from the delivery of the order confirmation. The Customer commits to paying for the goods supplied by Hydrocontrol s.p.a., according to the prices indicated on the order confirmation.

### Payment conditions

The Parties agree on the payment terms at the beginning of the supply. The terms will be indicated on the order confirmation. Should the Customer be late with the payments, Hydrocontrol S.p.a. will be entitled to require the payment of interests on arrears based on the exiting Prime Rate increased by 2%. Should there be any payment delay, Hydrocontrol s.p.a. will be entitled not to process the Customer's purchase order, even if it has already been confirmed.

### Delivery and shipment

The goods are always supplied Ex Works, even when Hydrocontrol s.p.a. agrees with the Customer that the shipment, or a part of it, will be arranged by Hydrocontrol s.p.a. It is agreed that the Customer will bear the risk of goods deterioration or damaging from the moment the goods are handed by Hydrocontrol s.p.a. to the first carrier.

### Product characteristics

Hydrocontrol s.p.a. commits to supplying good quality products, compliant with the technical specifications declared on the technical tables and on the catalogue. Hydrocontrol s.p.a, even without notice, at its own discretion, reserves the right to modify the products as necessary, without these changes altering the main characteristics of the products.

### Claims

Any claims about defects on delivered products (just as an example: claims about the packaging, the number, the quantity or the external product characteristics) will have to be notified to Hydrocontrol s.p.a. in writing, within and no later than 7 days from reception of the goods, otherwise the claims will be considered as null and void. Occult defects (the defects of the goods that cannot be spotted with a careful control of the goods received by the Customer), will have to be notified in writing to Hydrocontrol s.p.a. within 7 days from the discovery of the defect, and anyhow no later than 12 months from the delivery of the goods, otherwise the claim will be considered as null and void. Even in case of claim or objection, the Customer will never be entitled to suspend or delay the payments to Hydrocontrol s.p.a. for the products subject to claim or objection nor for any other supply.

**GENERAL CONDITIONS AND PATENTS****Warranty**

Should the products supplied by Hydrocontrol not be compliant or have the required quality and should this defect be due to Hydrocontrol, Hydrocontrol s.p.a. commits, at its choice, to replace or repair the faulty products, as long as the defect or lack of compliance is notified to Hydrocontrol s.p.a. in writing, as specified at point 6, within and no later than 18 months from product delivery. On the products that have been fixed or replaced in accordance with what specified above, the above-mentioned warranty applies. The 12 month duration starts from the date of repair or replacement. In case of defects, lack of quality or in case of lack of compliance for the supplied products, with the exception of fraud or serious offence, Hydrocontrol s.p.a. only commits to repairing or replacing the faulty products, according to what specified above. This warranty replaces any other Supplier's warranty or liability established by the law. This warranty excludes any other liability contractual or extra-contractual by Hydrocontrol s.p.a. on the products supplied by Hydrocontrol (as a mere example: damage refund, loss of profit, product recall campaign, etc). Hydrocontrol s.p.a. has signed a product civil liability police, with a suitable maximum coverage.

**Ownership retention**

The products supplied by Hydrocontrol s.p.a. will be owned by the latter until Hydrocontrol receives the complete payment for the supplied goods.

**Obligation confidentiality**

Hydrocontrol s.p.a. commits to not disclosing the technical and commercial information it receives from the Customer, unless this information has already been publicly disclosed.

**Patents**

The Customer is not allowed to use the provided Products, or a part of them, their descriptions or drawings protected or not protected by Patent or registered trademark in order to design or make similar products, unless Hydrocontrol s.p.a. previously issues its written authorization. Should Hydrocontrol s.p.a. give its written authorization, all patents, trademarks, registered designs, copyrights and intellectual property rights related or connected to the Products provided by Hydrocontrol s.p.a. will stay Hydrocontrol's property. The Customer commits to respecting the highest confidentiality.

**Applicable law and court of jurisdiction**

Hydrocontrol s.p.a.'s supplies are regulated by these General Supply Conditions and, for anything not defined here, by the Italian law. Any controversy related, generated or connected to the supply of Products by Hydrocontrol s.p.a., where Hydrocontrol s.p.a. is involved, will be exclusively dealt with by the Court of Bologna.
